

By the time failed wells surface, output has already dropped.

Failed wells surface one report at a time, and boats sail after output has already dropped. ProView brings wells, platforms and pipelines into one view.

Know which wells need attention before your morning meeting.

Bbl/day at risk

1,891

Morning briefing: 40 wells failed and 7 at risk, about 1,891 bbl/day affected.

Platforms to visit

PLT-013	2 failed	169 bbl/d
PLT-036	3 failed	154 bbl/d
PLT-028	2 failed · 1 at risk	160 bbl/d

40 failed wells flagged today

YOUR NEXT STEP

Start with one challenge. Prove it on your own data.

- 1 Bring one challenge**
Contractor clearance, failed wells, fuel balance or invoice delays.
- 2 Connect what you already have**
We start from your Excel registers, daily reports and databases. Scope, data access and success measures are agreed before we start.
- 3 Prove it, then scale**
Review the results with your team, then extend to more modules and sites.

Book a 20-minute walkthrough on your own data: info@waviv.com.

Bring one question from your field. We will walk you through it.

See it live at our booth.

Decisions you can
trace
Every figure sourced

Well risk score · next 7, 14 and 30 days

DEMO DATA

Well	7 d	14 d	30 d	Likely cause
PLT-013	82	88	91	ESP trip
PLT-036	64	71	79	Wax build-up
PLT-028	41	57	68	Capacity limit

PRODUCTION · PROVIEW

ProView flags wells needing attention, with every number traced to your data.

Monitor

Production from work group to well, on one map.

Predict

Each well's risk of stopping in 7, 14 and 30 days, from history.

Plan

Platform visits paired with vessels, in one trip.

Report

Daily reports, well remarks and validated Excel.

ZARA Meet ZARA. Agentic AI for operations, knowledge and decision-making.

ZARA plans the steps, checks the figures that matter against your records, and answers with sources. Read-only access. Any action waits for your confirmation. In English or Bahasa Indonesia.

What needs my attention today?

7 wells at risk within 14 days. Start with PLT-013 (169 bbl/d). Source: wells table.

ILLUSTRATIVE EXAMPLE

✓ Dashboards keep showing built-in summaries when AI is offline.

Start with: late failure detection or vessel visit planning.

CSMS review · ZARA and evaluator

DEMO DATA

Folder	Status	ZARA	Evaluator
A. HSE Plan	In review	45.50	48.00
1 Leadership & Commitment	Revision	3.00	3.00
2 HSE Policy & Objectives	Accepted	6.00	10.00

Evaluator raised the score after reviewing extra evidence.

HSE · SAFEVIEW

The same question applies to safety: who is cleared and what is expiring?

POB lists, contractor files and daily reports in one view, before the shift starts.

Measure

TRIR, LTI and safe manhours, updated daily.

Qualify

CSMS prequalification with multi-level approval.

People

POB and attendance with photo and location.

Report

Daily HSE reports, drills, findings, follow-up.

ZARA · ZARA reviews each contractor's CSMS (Contractor Safety Management System) folder against your criteria and attaches the evidence. **Your evaluator has the final say.**

✓ Every score cites its rule and source document.

Start with: contractor prequalification or POB accuracy.

Marine and cost teams can catch fuel, vessel and contract issues earlier.

MARINE

Every vessel, crew and fuel record in one marine view.

Vessel positions, fuel logs and crew certificates joined, from planning to reporting.

Marine Operations

Fuel Monitoring

Marine Assurance

On-hire checks, SPR (Service Performance Review), crew

Weather & Aviation

BMKG alerts

31 items onboard

Start with: fuel balance or on-hire vessel assurance.

COST

Contracts, budgets and invoices, tracked in one place.

Follows each cost line from tender to payment.

Contract Monitoring

Cost Positioning

ABO (Opex) and ABI (Capex) against actuals

Tender & Procurement

Invoice Tracking

✓ Validators check data as it enters WAVIV; vendors upload documents directly.
